Competent authority of the creator of the PIPDOZIP in relation to the KID: Financial Supervision Commission - www.fsc.bg

Date of issue of the KID: January 2025

You are about to purchase a product that is not straightforward and may be difficult to understand

What is this product?

Type – Life insurance linked to the Global Selection Timing 100-1 investment fund with ISIN number BE6338220468 (the Investment Fund/Fund), which is a sub-fund of an investment company fund governed by Belgian law, Perspective Fund.

Objectives – The product aims to provide insurance cover for the insured person and offers an investment opportunity through the payment of a single premium.

The Global Selection Timing 100-1 Investment Fund invests in:

- SPV bonds, other bonds and debt instruments, deposits and/or cash. SPVs are 'Special Purpose Vehicles' (SPVs) managed by KBC Asset Management or one of its subsidiaries, which issue financial instruments and
- swap agreements with one or more counterparties.

The investment fund aims to preserve at least 100% of the initial net asset value on the maturity date, whilst at the same time achieving a potential return.

The fund's return is linked to the performance of a basket of 30 shares from a global selection of companies characterised by high market capitalisation.

If the value of the basket has increased by the maturity date, a return of up to 60% of the positive change in value may be achieved. If the value of the basket has fallen by the maturity date, the client does not receive any additional return, but retains 100% of their initial investment minus the entry fee.

Further information regarding the fund's investment strategy can be found in the fund's prospectus and in the Key Investor Information Document at www.dzi.bg

Orders to redeem units in the fund are executed twice a month.

Further information regarding the fund's investment strategy and its composition can be found in the prospectus and the fund's Key Information Document at www.kbc.be/kid.

Term of the contract and period of insurance cover - 6 years, 2 months and 12 days .

Maturity date – 28 February 2029

Currency – euro

Target retail investor – this product is suitable for clients who are seeking a combination of investment opportunities and insurance cover; have an investment horizon up to 28 February 2029; for whom preserving the invested amount is important; are prepared to take on a certain level of risk in return for a potentially higher return and can withstand limited losses in adverse conditions; have at least a basic knowledge and/or experience of investing.

Insurance benefits and costs

COVERED RISKS

PAYMENTS / CLAIMS

Survival to the end of the contract term	Beneficiaries will be paid the value of the investment units held on the maturity date, but not less than the investment premium.
Death as a result of an accident	In the event of death, the beneficiaries shall be paid the sum insured, in addition to the value of the investment units held, calculated at the current unit price on the first valuation date of the fund following notification of the event. <i>In the event of the insured person's death during the term of the contract for a reason other than an accident, the beneficiaries are paid the value of the investment units held, calculated at the unit price on the first valuation date of the fund following notification of the event, and the insurance is terminated.</i>

The value of the benefits is set out in the section 'What are the risks and what return might I receive?', along with information reflecting the typical biometric characteristics of the target individual investors. The total premium, the biometric risk premium (which forms part of the total premium) and its impact on the return on investment at the end of the recommended holding period, taken into account in the calculated one-off costs in the 'Costs over time' table, are presented.

What are the risks and what return might I receive?

← Lower risk

Higher risk →

The risk indicator is based on the assumption that you will hold the product for 6 years, 2 months and 12 days.

The actual risk may vary significantly if you cash in early, and the return may also be lower.

The summary risk indicator provides information on the level of risk associated with this product compared to other products. It shows the likelihood of a financial loss on this product as a result of market movements or because we may not be able to pay you.

We have assigned this product a risk category of 3 out of 7 – ‘medium-low risk’. The potential loss from future performance is category 3 out of 7, and adverse market conditions could affect our ability to pay you.

You are entitled to receive back at least 100% of your initial investment on the maturity date. Any amount above this, as well as any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you redeem the product before its maturity date. If we are unable to pay you the amount due, you may lose your entire investment.

Please note that there is a currency risk. You will receive payments in a different currency, so the final return will depend on the exchange rate between the two currencies. This risk is not included in the indicator shown above.

Please note that there is a moderate inflation risk: there is no protection against rising inflation.

SCENARIOS FOR THE RESULTS

The figures shown include all costs associated with the product itself, including the fees for your adviser or the person offering you the product. These figures do not take into account your tax status, which may affect your return.

The return on this product depends on future market performance. Future market trends are uncertain and cannot be accurately predicted. The illustrative scenarios provided are based on past performance and certain assumptions. Future market movements may differ significantly from those observed.

The stress scenario shows the likely return under extreme market conditions.

RECOMMENDED HOLDING PERIOD 4 years and 2 months		If you cash out after	If you cash in after
Example investment: €10,000, Insurance premium: €16.00		1 year	4 years and 2 months
Scenario (life)			
Minimum return	There is no minimum guaranteed return. You may lose some or all of your investment.		
CRISIS SCENARIO	What you would receive after deducting costs	€8,569	€9,750
	Average annual return	-14.30%	-0.60%
PESSIMISTIC SCENARIO	What you would receive after deducting costs	€9,257	€9,750
	Average annual return	-7.40%	-0.60%
MODERATE SCENARIO	What you would receive after deducting costs	€9,836	€12,701
	Average annual return	-1.60%	5.90%
OPTIMISTIC SCENARIO	What you would receive after deducting costs	€10,479	€13,712
	Average annual return	4.80%	7.90%
Scenario of the occurrence of the insured event (death as a result of an accident)			
Insured event (death as a result of an accident)	What the beneficiaries would receive after deduction of costs	20,354 EUR	EUR 22,701

The example is for a contract with a single investment of €10,000 and a term of 6 years, 2 months and 12 days.

What happens if DZI Life Insurance EAD is unable to pay the amount due?

As an insurer, DZI Life Insurance EAD sets aside reserves for the amounts received from clients under each insurance policy, thereby guaranteeing the future payment of the insurance sums.

Insurance sums and claims, as well as the insurance reserve, are guaranteed by the Guarantee Fund in the event of an insurer's insolvency, up to 196,000 leva per insured person, in accordance with Article 565 of the Insurance Code.

What are the costs?

The person offering you this product or advising you on it may charge you other fees. In such a case, that person will inform you of these fees and show you how they affect your investment.

COSTS OVER TIME

The tables show the amounts deducted from your investment to cover various types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown are illustrative and have been calculated based on an example investment amount and various possible holding periods.

Our assumptions are as follows:

- after 4 years and 2 months, you will receive your invested funds back (5.90% annual return); for the remaining holding periods, we assume that the product's results are as shown in the moderate scenario;

- €10,000 has been invested.

INVESTMENT OF €10,000	IF YOU CASH OUT AFTER	
	1 year	4 years and 2 months
Total costs	€768	250 EUR
Annual impact of costs*	7.83%	0.65%

*This shows how costs reduce your annual return over the holding period. For example, if you withdraw your investment at the end of the recommended holding period, the average annual return is expected to be 6.55% before costs and 5.90% after costs.

COST COMPONENTS

One-off charges – initial charge and withdrawal charge withdrawal		Annual impact of costs if you withdraw your investment after 4 years and 2 months
Initial fee	When you make the initial investment, you pay 0.65% of it.	For insurance cover 0.05% For administrative costs 0.60%
Withdrawal fee	We do not charge a withdrawal fee. The next column states that the withdrawal fee 'does not apply', as there is no such fee if you hold the product for the recommended holding period.	Not applicable
Ongoing charges levied annually		
Management fees and other administrative or operational costs	0.90% of the value of your investment per year. This is an estimate, as no up-to-date data for the last year is yet available.	0.90%
Transaction costs	0% of the value of your investment per year. This is an estimate of our costs for buying and selling the product's underlying instrument. The actual figure will vary depending on how much we buy and sell.	0%
Incidental costs charged in specific circumstances		
Performance fee	There is no performance fee for this product	0%

How long should I keep my money in and can I withdraw it early?

Recommended holding period: 4 years and 2 months

The policyholder is entitled to cash in early (surrender) one month after the start of the contract.

They receive the accumulated funds after a surrender charge of 5% of the withdrawn amount has been applied.

How can I make a complaint?

The user of insurance services may submit complaints regarding insurance claims to "DZI – Life Insurance" EAD at the following address: Sofia 1463, 89B Vitosha Blvd, or at the addresses of DZI's regional branches, available at www.dzi.bg or by email: clients@dzi.bg, as well as via DZI's national helpline: 0700 16 166.

Complaints against the insurer, depending on their nature, may be submitted to the Financial Supervision Commission, the Consumer Protection Commission, as well as to other competent institutions.

Other useful information

Tax relief – This product allows for deferred tax payment in accordance with current tax legislation.
